Our customer service is available all day, and your problems can be solved efficiently at any time. Last but not least, we can guarantee the security of the purchase process of 2V0-11.24 Test Questions and the absolute confidentiality of customer

information. You do not have to worry about these issues, because we know that this is a basic condition for us to establish a good business model. If you have any questions, you can always contact us online or email us. We will reply as soon as possible.

## VMware 2V0-11.24 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Developer Fundamentals: This section of the exam measures the skills of Salesforce Developers and covers key concepts such as multi-tenant architecture, MVC framework, and the Lightning Component Framework. It evaluates the ability to differentiate between declarative and programmatic customization approaches while considering governor limits, formula fields, and roll-up summaries. Candidates must demonstrate proficiency in defining data models, including objects, fields, relationships, and external IDs. Additionally, they should understand the best practices for importing and exporting data within development environments.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Testing, Debugging, and Deployment: This section of the exam measures the skills of Salesforce DevOps Engineers and focuses on writing and executing tests for triggers, controllers, and automation processes. Candidates should understand how to utilize Salesforce Developer tools like Salesforce DX, CLI, and Developer Console for troubleshooting. The section also covers debugging strategies for monitoring flows, processes, and asynchronous jobs. Furthermore, it evaluates knowledge of different deployment environments, requirements, and best practices for releasing code and configurations efficiently.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Process Automation and Logic: This section of the exam measures the skills of Apex Developers and focuses on the capabilities of declarative process automation tools and Apex programming. It includes defining variables, constants, and methods while understanding the use of modifiers and interfaces. Candidates must be able to apply control flow statements, write SOQL, SOSL, and DML statements, and follow best practices for Apex classes and triggers. The section also assesses knowledge of governor limits, transaction management, execution order, and recursion. Additionally, candidates should be able to implement error handling using standard and custom exceptions.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>User Interface: This section of the exam measures the skills of Lightning Developers and covers UI customization using Visualforce pages, Lightning Components, and Flow. Candidates must understand how to securely display and modify Salesforce data through controllers or extensions while ensuring protection against security vulnerabilities. The section also evaluates knowledge of Lightning Web Components, event handling, and best practices for creating custom UI components. Additionally, it assesses the ability to integrate Apex with various UI elements such as Lightning Components, Flow, and Next Best Actions.</li></ul>

## VMware Cloud Foundation 5.2 Administrator Sample Questions (Q34-Q39):

### NEW QUESTION # 34

An administrator logged into NSX Manager to view host details. The administrator noticed that the "Tunnel" status for the ESXi hosts, in the V1 workload domain, is showing down.

What is a possible reason the ESXi host tunnels are showing down in NSX?

- A. The MTU setting for the host TEPs has been set to 1500.
- B. The IGMP has been disabled on the network.
- C. The host TEP IP addresses are being dynamically assigned through DHCP instead of being statically assigned.
- D. The overlay traffic is being blocked by the gateway firewall.

**Answer: A**

Explanation:

The "Tunnel" status in NSX indicates the status of the VXLAN tunnels used for communication between ESXi hosts. If the MTU setting for the host Tunnel Endpoint (TEP) is incorrectly set to 1500, this can cause issues with VXLAN encapsulation, as VXLAN packets typically require an MTU of at least 1600 bytes to function correctly. Setting the MTU too low can cause packet drops and result in the tunnel status being down.

### NEW QUESTION # 35

What is the first step in configuring certificate management for VMware Cloud Foundation?

- **A. Review Documentation**
- B. Validate Settings
- C. Configure SSL
- D. Install CA Certificates

**Answer: A**

Explanation:

CA certificates should be installed after reviewing the requirements.

SSL configuration occurs later in the process.

Validation of settings should happen after configuration.

Documentation should be reviewed before configuration begins.

### NEW QUESTION # 36

What is the significance of health checks in VMware Aria Suite?

- **A. Identify Configuration Issues**
- B. User Feedback
- C. Resource Usage
- D. Performance Monitoring

**Answer: A**

Explanation:

Monitoring performance is secondary to health checks.

User feedback is often unreliable for technical troubleshooting.

Resource usage checks are not specific to health assessment.

Health checks help identify misconfigurations and operational problems.

### NEW QUESTION # 37

When would you consider using vSphere IaaS control plane for scaling applications?

- A. Batch Jobs
- B. Only for VMs
- **C. Microservices**
- D. Monolithic Applications

**Answer: C**

Explanation:

It is not optimized for monolithic applications. It is not primarily designed for batch job processing. It is ideal for deploying and scaling microservices. It is designed to scale containerized applications, not just VMs.

### NEW QUESTION # 38

What is the primary purpose of creating a vSphere Namespace in VMware Cloud Foundation?

- **A. Resource Management**
- B. Backup Solutions
- C. Network Security
- D. Performance Monitoring

**Answer: A**

Explanation:

Performance monitoring is not the main function of a vSphere Namespace.

- It allows for better management of resources across clusters.
- It does not primarily focus on network security.
- Backup solutions are unrelated to the creation of namespaces.

### NEW QUESTION # 39
