

Your Trusted Partner for NSE6_FSW-7.2 Exam Questions

Fortinet NSE6_FAZ-7.2 Practice Questions

Fortinet NSE 6 - FortiAnalyzer 7.2 Administrator

Order our NSE6_FAZ-7.2 Practice Questions Today and Get Ready to Pass with Flying Colors!

NSE6_FAZ-7.2 Practice Exam Features | QuestionsTube

- Latest & Updated Exam Questions
- Subscribe to FREE Updates
- Both PDF & Exam Engine
- Download Directly Without Waiting

https://www.questionstube.com/exam/nse6_faz-7-2/

At QuestionsTube, you can read NSE6_FAZ-7.2 free demo questions in pdf file, so you can check the questions and answers before deciding to download the Fortinet NSE6_FAZ-7.2 practice questions. These free demo questions are parts of the NSE6_FAZ-7.2 exam questions. Download and read them carefully, you will find that the NSE6_FAZ-7.2 test questions of QuestionsTube will be your great learning materials online. Share some NSE6_FAZ-7.2 exam online questions below.

What's more, part of that ITexamReview NSE6_FSW-7.2 dumps now are free: https://drive.google.com/open?id=1dykiNMgWvLSme4-eKskFn_kC2LzXHFv4

Our Fortinet NSE 6 - FortiSwitch 7.2 test torrent boost 99% passing rate and high hit rate so you can have a high probability to pass the exam. Our NSE6_FSW-7.2 study torrent is compiled by experts and approved by the experienced professionals and the questions and answers are chosen elaborately according to the syllabus and the latest development conditions in the theory and the practice and based on the real exam. The questions and answers of our NSE6_FSW-7.2 Study Tool have simplified the important information and seized the focus and are updated frequently by experts to follow the popular trend in the industry. Because of these wonderful merits the client can pass the exam successfully with high probability.

Fortinet NSE6_FSW-7.2 Certification Exam is designed for network security professionals who specialize in Fortinet's FortiSwitch platform. Fortinet NSE 6 - FortiSwitch 7.2 certification validates the skills and knowledge required to configure, administer, and troubleshoot FortiSwitch products in a network environment. NSE6_FSW-7.2 exam covers a wide range of topics, including VLANs, link aggregation, spanning tree protocol, and access control lists, ensuring that certified professionals are well-versed in all aspects of FortiSwitch deployment.

Fortinet NSE6_FSW-7.2 certification exam is designed to test the knowledge and skills of network security professionals in working with the FortiSwitch 7.2 platform. Fortinet NSE 6 - FortiSwitch 7.2 certification is intended for individuals who are responsible for implementing and managing network security solutions using Fortinet products. NSE6_FSW-7.2 Exam covers a wide range of topics, including FortiSwitch configuration, VLANs, DHCP, and port security.

The NSE6_FSW-7.2 exam is designed for network administrators, engineers, and architects who work with FortiSwitch solutions on a daily basis. Fortinet NSE 6 - FortiSwitch 7.2 certification exam provides a way for professionals to validate their knowledge and skills, demonstrate their expertise to employers, and enhance their career prospects. NSE6_FSW-7.2 exam is available globally, and you can take it at a Pearson VUE testing center or online through the Pearson VUE OnVUE platform.

Valid Exam NSE6_FSW-7.2 Book | NSE6_FSW-7.2 100% Free New Exam Answers

If you want to get satisfaction with the preparation and get desire result in the NSE6_FSW-7.2 real exam then you must need to practice our Fortinet braindumps and latest questions because it is very useful for preparation. You will feel the atmosphere of NSE6_FSW-7.2 Actual Test with our online test engine and test your ability in any time without any limitation. There are also NSE6_FSW-7.2 free demo in our website for you download.

Fortinet NSE 6 - FortiSwitch 7.2 Sample Questions (Q10-Q15):

NEW QUESTION # 10

Which statement about the use of the switch port analyzer (SPAN) packet capture method is true?

- A. Traffic on the management interface can be mirrored and captured by the monitoring device.
- **B. Mirrored traffic can be sent across multiple switches.**
- C. The monitoring device must be connected to the same switch where the traffic is being mirrored
- D. SPAN can be configured only on a standalone FortiSwitch.

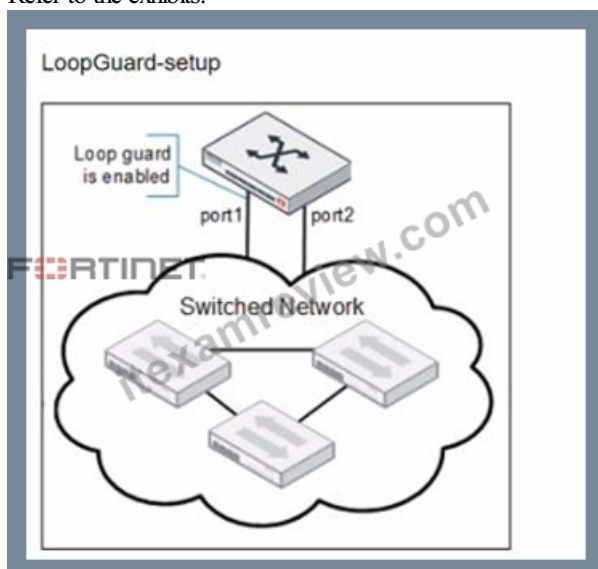

Answer: B

Explanation:

The correct statement about using the Switch Port Analyzer (SPAN) packet capture method on FortiSwitch is that "Mirrored traffic can be sent across multiple switches (A)." This feature allows for extensive traffic analysis as it enables network administrators to configure SPAN sessions that span across different switches, thereby providing the capability to monitor traffic across a broad segment of the network infrastructure.

NEW QUESTION # 11

Refer to the exhibits.

```
# diagnose switch-controller switch-info loop-guard S108EF4N17000029
```

S108EF4N17000029:

Portname	State	Status	Timeout (m)	MAC-Move	Count	Last-Event
port1	enabled	Triggered	2	0	1	2021-02-19 15:50:35
port2	disabled	-	-	-	-	-
port3	disabled	-	-	-	-	-
port4	disabled	-	-	-	-	-
port5	disabled	-	-	-	-	-
port6	disabled	-	-	-	-	-
port9	disabled	-	-	-	-	-
port10	disabled	-	-	-	-	-
8EF4N17000030-0	disabled	-	-	-	-	-
_FlInK1_MLAG0_	disabled	-	-	-	-	-

Port1 and port2 are the only ports configured with the same native VLAN 10.
What are two reasons that can trigger port1 to shut down? (Choose two.)

- A. Loop guard frame sourced from port 1 was received on port 1.
- **B. STP triggered a loop and applied loop guard protection on port1.**
- **C. port1 was shut down by loop guard protection.**
- D. An endpoint sent a BPDU on port1 that it received from another interface.

Answer: B,C

Explanation:

When loop guard is enabled on port1 and port2 configured with the same native VLAN (VLAN 10), there are specific scenarios under which port1 can be shut down due to loop guard operation:

A . port1 was shut down by loop guard protection. Loop guard is a specific feature used in network environments to prevent alternative or redundant loops. When loop guard is active, it can shut down a port if it stops receiving BPDU (Bridge Protocol Data Units) on a port that is expected to receive them, assuming a loop or link failure and putting the port into an inconsistent state to prevent potential loops.

B . STP triggered a loop and applied loop guard protection on port1. If the Spanning Tree Protocol (STP) detects a loop or loss of BPDU transmissions while loop guard is enabled, it will proactively shut down the port to prevent network instability or a broadcast storm. This is an essential function of loop guard within the context of STP, providing additional protection against topology changes that could introduce loops.

Reference:

Additional details about loop guard functionality and STP interaction can be found in the FortiSwitch administration guides, accessible via Fortinet Documentation.

NEW QUESTION # 12

How is traffic routed on FortiSwitch?

- A. ASIC hardware routing can only handle dynamic routing, if supported.
- B. Hardware-based routing on FortiSwitch is handled by the CPU.
- **C. FortiSwitch looks up the hardware routing table and then the forwarding information base (FIB).**
- D. Layer 3 routing can be configured on FortiSwitch, while managed by FortiGate.

Answer: C

NEW QUESTION # 13

Which interfaces on FortiSwitch send out FortiLink discovery frames by default in order to detect a FortiGate with an enabled FortiLink interface?

- A. The last four switch ports on FortiSwitch have auto-discovery enabled by default.

- B. All ports have auto-discovery enabled by default.
- C. The ports with auto-discovery enabled by default are dependent upon the FortiSwitch model.
- D. No ports are enabled by default for auto-discovery. This must be configured under config switch interface.

Answer: B

NEW QUESTION # 14

Which feature should you enable to reduce the number of unwanted IGMP reports processed by the IGMP querier?

- A. Enable IGMP flood unknown multicast traffic on the global setting.
- B. Enable IGMP snooping proxy.
- C. Enable the IGMP flood setting on the static port for all multicast groups.
- D. Enable the IGMP flood reports setting on the mRouter port.

Answer: B

Explanation:

Enable IGMP snooping proxy (C): To reduce the number of unwanted IGMP reports processed by the IGMP querier, enabling IGMP snooping proxy is effective. This feature acts as an intermediary between multicast routers and hosts, optimizing the management of IGMP messages by handling report messages locally and reducing unnecessary IGMP traffic across the network. This minimizes the processing load on the IGMP querier and improves overall network efficiency.

NEW QUESTION # 15

.....

NSE6_FSW-7.2 exam questions have a very high hit rate, of course, will have a very high pass rate. Before you select a product, you must have made a comparison of your own pass rates. Our NSE6_FSW-7.2 study materials must appear at the top of your list. And our NSE6_FSW-7.2 learning quiz has a 99% pass rate. This is the result of our efforts and the best gift to the user. And it is also proved and tested the quality of our NSE6_FSW-7.2 training engine is excellent.
