Providing You Pass-Sure ZDTA Free Vce Dumps with 100% Passing Guarantee

If you are the first time to prepare the ZDTA exam, it is better to choose a type of good study materials. After all, you cannot understand the test syllabus in the whole round. It is important to predicate the tendency of the ZDTA study materials if you want to easily pass the exam. Now, all complicate tasks have been done by our experts. They have rich experience in predicating the ZDTA exam. Then you are advised to purchase the study materials on our websites. Also, you can begin to prepare the ZDTA Exam. You are advised to finish all exercises of our ZDTA study materials. In fact, you do not need other reference books. Our study materials will offer you the most professional guidance. In addition, our ZDTA study materials will be updated according to the newest test syllabus. So you can completely rely on our ZDTA study materials to pass the exam.

Zscaler Digital Transformation Administrator Sample Questions (Q32-Q37):

NEW QUESTION # 32

Which filtering policy blocked access to the Network Application?

- A. DLP
- B. Browser Control
- C. Sandbox
- **D. Firewall Filtering**

Answer: D

Explanation:

Firewall Filtering policies govern network-level application traffic, so access to a Network Application is blocked by a Firewall Filtering rule.

NEW QUESTION # 33

For a deployment using both ZIA and ZPA set of services, what is the best authentication solution?

- A. Use forms Authentication for both ZIA and ZPA
- **B. Configure Authentication using SAML on both ZIA and ZPA**
- C. Use forms Authentication in ZIA and SAML in ZPA
- D. Use forms Authentication in ZPA and SAML in ZIA

Answer: B

Explanation:

For a unified, seamless experience - and because ZPA only supports SAML while ZIA's recommended authentication is also SAML - you should configure SAML-based SSO on both ZIA and ZPA. This ensures one consistent identity flow and eliminates multiple credential prompts across the platforms.

NEW QUESTION # 34

What is the default policy configuration setting for checking for Viruses?

- **A. Block**
- B. Malware Protection
- C. Allow
- D. Unwanted Applications

Answer: A

Explanation:

Out of the box, Zscaler's Malware Protection policy is configured to block any traffic identified as a virus, ensuring known malicious files are denied immediately.

NEW QUESTION # 35

When the Zscaler Client Connector launches, which portal does it initially interact with to understand the user's domain and identity provider (IdP)?

- A. Zscaler Internet Access (ZIA) Portal
- B. Zscaler Private Access (ZPA) Portal
- C. Zscaler Client Connector Portal
- **D. Zscaler Central Authority**

Answer: D

Explanation:

When the Zscaler Client Connector launches, it initially interacts with the Zscaler Central Authority portal.

This portal provides the Client Connector with information about the user's domain and the configured identity provider (IdP). This interaction allows the Client Connector to direct the user to the appropriate authentication endpoint and apply the correct access policies.

The study guide emphasizes the role of the Central Authority in managing user domain information and identity provider details for authentication flows.

NEW QUESTION # 36

An organization has more than one ZIA instance, each on different clouds. The organization is using the same login domain for both and upon login users are given this menu in ZCC asking which cloud they would like to join. What steps could an Administrator take to avoid having this menu appear?

- A. Create only one SAML integration with the desired ZIA instance.
- **B. Customize an MSI version of the ZCC file specifying the CLOUDNAME variable.**
- C. Federate the login domain between two different IDP instances.
- D. Customize an MSI version of the ZCC file specifying the USERDOMAIN variable.

Answer: B

Explanation:

To avoid prompting users with a cloud selection menu in the Zscaler Client Connector (ZCC), administrators should customize the MSI installation package with the CLOUDNAME parameter. This setting ensures the ZCC automatically connects to the correct ZIA cloud instance without user intervention. The CLOUDNAME corresponds to the designated cloud name for the organization's ZIA tenant, effectively bypassing the prompt.

This is outlined under Zscaler's deployment and configuration instructions for ZCC.
