

Zertifizierung der 1z0-1080-24 mit umfassenden Garantien zu bestehen

Außerdem sind jetzt einige Teile dieser EchteFrage 1z0-1080-24 Prüfungsfragen kostenlos erhältlich: <https://drive.google.com/open?id=1DnGsd04BGbpGPO1g0wF5Mt1KcsIdlMDP>

Wir EchteFrage bieten alle mögliche Vorbereitungsunterlagen von Oracle 1z0-1080-24 Zertifizierungsprüfung. Sie können die Oracle 1z0-1080-24 Prüfungsunterlagen in verschiedenen Webseiten und Büchern finden. Aber unsere Prüfungsfragen und Testantworten sind die besten und die umfassendsten. Unsere Oracle 1z0-1080-24 Prüfungsfragen und -antworten können Ihnen helfen, nur einmal diese Prüfung zu bestehen. Und Sie können weniger Zeit verwenden.

Haben Sie an der Oracle 1z0-1080-24 Zertifizierungsprüfung teilgenommen? Was kann ich machen, wenn ich die Prüfung ablege, daran ich nicht selbstbewusst bin? Gibt es Abkürzung für die 1z0-1080-24 Prüfung? Es gibt nicht genug Zeit, die Bücher auswendig zu lernen. Sind Sie der ähnlichen Meinungen? Wenn ja, kümmern Sie sich nicht darum, weil Sie immer noch die Chance haben diese 1z0-1080-24 Prüfung gut vorzubereiten, obwohl die Prüfungszeit vor Ihnen schnell auftaucht? Wie kann ich diese Chance finden? Das ist die Oracle 1z0-1080-24 Dumps von EchteFrage. Es gibt hocheffektive Prüfungsunterlagen zur Zertifizierung. Es kann Ihnen helfen, in kurzer Zeit die Prüfungsfragen vorzubereiten. Die Hitz-Rate dieser dumps sind sehr hoch. Deshalb können Sie Oracle 1z0-1080-24 Zertifizierungsprüfung bestehen, wenn Sie die Prüfungsfragen und -antworten gut lernen.

1z0-1080-24 Studienmaterialien: Oracle Planning 2024 Implementation

Professional - 1z0-1080-24 Torrent Prüfung & 1z0-1080-24 wirkliche Prüfung

Heutzutage hat ein Fachqualifizierter große Vorteile in der heute konkurrenzfähigen Gesellschaft, besonders im IT-Bereich. Einige IT-Zertifikate zu bekommen ist sehr nützlich. Die Oracle 1z0-1080-24 Zertifizierungsprüfung ist eine Prüfung, die das Niveau der fachlichen Kenntnissen überprüft und stellt ein großes Gewicht in der IT-Branche dar. Wegen der Schwierigkeit der Oracle 1z0-1080-24 (Oracle Planning 2024 Implementation Professional) Zertifizierungsprüfung hat man viel Zeit und Energie für die Prüfung benutzt. Jedoch sind sie am Ende doch in der Prüfung durchgefallen. Die Gründe dafür liegt darin, dass Sie nicht an der speziellen Kursen teilnehmen. Nun haben Experten die zielgerichteten Prüfungen entwickelt, die Ihnen helfen, viel Zeit und Energie zu ersparen und trotzdem die Prüfung 100% zu bestehen.

Oracle 1z0-1080-24 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Manage Rules: This section of the exam measures the skills of business rule developers and focuses on designing business rules and rulesets. It explains the benefits of Groovy Rules in enhancing performance and flexibility within Planning applications.
Thema 2	• Planning Overview: This section of the exam measures the skills of planning administrators and focuses on understanding the features of Planning applications. It includes setting up Planning and Freeform applications, managing dimensions, and explaining the impact of dimension hierarchies. It also covers configuring valid and invalid intersections and cell-level security.
Thema 3	• Maintain Planning: This section of the exam measures the skills of system administrators and focuses on monitoring maintenance tasks for Planning applications. It includes scheduling jobs, managing EPM Automate for automation tasks, backing up data, migrating metadata, cloning environments, and maintaining system updates.
Thema 4	• Manage Approvals: This section of the exam measures the skills of approval process managers and covers setting up approval workflows in Planning. It explains how to configure approval processes to streamline decision-making within organizations.
Thema 5	• Introduction to Planning Modules: This section of the exam measures the skills of module planners and introduces Planning modules. It includes integrating modules, leveraging best practices for module planning, and configuring Financials, Workforce, Capital, and Projects.
Thema 6	• Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of dashboard designers and covers designing forms, dashboards, and validation rules. It also includes creating and managing navigation flows to streamline user experience within Planning applications.
Thema 7	• Configure Intelligent Performance Management: This section of the exam measures the skills of machine learning specialists and focuses on configuring IPM components. It includes setting up machine learning models for predictive analytics within Planning applications.
Thema 8	• Manage Metadata and Data: This section of the exam measures the skills of data integration specialists and covers metadata and data management in Planning. It includes identifying metadata and data load options, importing and exporting metadata and data, setting up and running data maps, creating data integrations, and mapping data across applications.
Thema 9	• Set Up Planning Security: This section of the exam measures the skills of security administrators and focuses on provisioning users and groups. It includes assigning access permissions to artifacts and cells in Planning to ensure secure access to critical information.

Oracle Planning 2024 Implementation Professional 1z0-1080-24 Prüfungsfragen mit Lösungen (Q12-Q17):

12. Frage

Your administrator creates a Pipeline definition to manage metadata, and data for your Planning application.

Which statement about pipelines is true?

- **A. Use pipelines to coordinate the running of a series of jobs as a single process.**
- B. Use pipelines as a visible, automated, and repeatable system of record for running an application.
- C. Develop pipelines to guide you through the Planning process.
- D. Quickly drill into data slices that are important to you with pipelines.

Antwort: A

Begründung:

In Oracle Planning 2024, a Pipeline is a feature that allows administrators to define and automate a sequence of jobs (e.g., data imports, metadata updates, calculations) as a single, coordinated process. Pipelines streamline the management of metadata and data by executing multiple tasks in a specified order, ensuring dependencies are met, and providing a repeatable workflow for maintaining the Planning application.

* A. Develop pipelines to guide you through the Planning process: Incorrect. Pipelines are not a planning guide; they are an automation tool for executing jobs, not a process framework.

* B. Use pipelines as a visible, automated, and repeatable system of record for running an application:

Incorrect. While pipelines are automated and repeatable, they are not a "system of record" for running the entire application—they focus on specific job sequences.

* C. Use pipelines to coordinate the running of a series of jobs as a single process: Correct. This aligns with the Oracle definition of pipelines, which orchestrate multiple jobs (e.g., import data, refresh database) into one executable process.

* D. Quickly drill into data slices that are important to you with pipelines: Incorrect. Pipelines are not designed for data analysis or drilling into data slices; they are for job automation.

The Oracle documentation emphasizes that pipelines are used to manage and execute a series of jobs efficiently, making C the true statement.

References:

* Oracle Planning 2024 Implementation Study Guide: "Working with Pipelines" (docs.oracle.com, Published 2024-10-05).

* Oracle EPM Cloud Documentation: "Automating Tasks with Pipelines" (docs.oracle.com, Published 2023-11-30, updated for 2024).

13. Frage

In which three ways can you create data maps that copy data using Smart Push?

- A. From Tax Reporting Cloud to Planning
- **B. From Planning to Financial Consolidation and Close**
- **C. From Financial Consolidation and Close to Planning**
- D. From Planning to Tax Reporting Cloud
- **E. Between two Planning instances**

Antwort: B,C,E

Begründung:

In Oracle Planning 2024, Smart Push is a feature within data maps that enables efficient, real-time data movement between Oracle EPM Cloud applications or instances. It copies data dynamically when triggered (e.g., via forms or rules). The three supported ways to create data maps with Smart Push are:

* A. From Planning to Tax Reporting Cloud: Incorrect. Smart Push does not support direct data movement from Planning to Tax Reporting Cloud, as these modules lack a predefined integration path for this feature.

* B. From Tax Reporting Cloud to Planning: Incorrect. Similarly, Smart Push does not facilitate data movement from Tax Reporting Cloud to Planning.

* C. From Financial Consolidation and Close to Planning: Correct. Smart Push supports moving consolidated data (e.g., actuals) from Financial Consolidation and Close (FCC) to Planning for planning purposes.

* D. From Planning to Financial Consolidation and Close: Correct. Smart Push allows pushing planned data from Planning to FCC for consolidation or reporting.

* E. Between two Planning instances: Correct. Smart Push can move data between two Planning instances (e.g., test and production environments) to synchronize data.

These three options—C, D, and E—are explicitly supported by Smart Push in Oracle EPM Cloud, as per the documentation, enabling seamless data integration across these applications.

References:

* Oracle Planning 2024 Implementation Study Guide: "Using Smart Push in Data Maps" (docs.oracle.com, Published 2024-09-30).

* Oracle EPM Cloud Documentation: "Data Integration with Smart Push" (docs.oracle.com, Published 2023-12-20, updated for 2024).

14. Frage

Which statement describes infolets?

- A. Infolets are predefined dashboards that give you insight into the overall project financials and expense and revenue metrics.
- B. Infolets are a form type that provides flexible row management where dimension and member row cells and all data cells are unprotected.
- C. Infolets give business process designers control over how various roles or groups interact with a business process.
- D. Infolets help you organize, track, and prioritize your workload.
- E. Infolets help you quickly analyze data and understand key business questions by presenting a visual overview of high-level, aggregated information.

Antwort: E

Begründung:

In Oracle Planning 2024 Implementation, infolets are a feature designed to provide users with quick, visual insights into critical business data. They are not full dashboards, task management tools, or process control mechanisms, but rather compact, high-level representations of aggregated information.

* C. Infolets help you quickly analyze data and understand key business questions by presenting a visual overview of high-level, aggregated information: This statement accurately describes infolets.

They are visual tiles or widgets that display summarized data (e.g., KPIs, trends) to help users grasp key business insights at a glance. Infolets are typically found on the home page or navigation clusters and are customizable to highlight specific metrics relevant to the user's role or application.

* A. Infolets are predefined dashboards that give you insight into the overall project financials and expense and revenue metrics: While infolets provide insights, they are not full "predefined dashboards." Dashboards are more comprehensive, whereas infolets offer concise, targeted views of data.

* B. Infolets help you organize, track, and prioritize your workload: This describes task management or navigation features (e.g., task lists), not infolets, which focus on data visualization rather than workload management.

* D. Infolets give business process designers control over how various roles or groups interact with a business process: Infolets are not about process design or role interaction; they are about displaying data, not controlling processes.

* E. Infolets are a form type that provides flexible row management where dimension and member row cells and all data cells are unprotected: Infolets are not a form type; they are separate from forms and focus on visualization, not data entry or row management.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Using Infolets" (docs.oracle.com, updated 2024). Describes infolets as "visual overviews of high-level, aggregated information to quickly analyze data and answer business questions."

* Oracle Planning 2024 Implementation Study Guide: Defines infolets as tools for presenting summarized data visually for quick analysis.

15. Frage

In which three ways can you create data maps that copy data using Smart Push?

- A. From Tax Reporting Cloud to Planning
- B. From Planning to Financial Consolidation and Close
- C. From Financial Consolidation and Close to Planning
- D. From Planning to Tax Reporting Cloud
- E. Between two Planning instances

Antwort: B,C,E

Begründung:

In Oracle Planning 2024, Smart Push is a feature within data maps that enables efficient, real-time data movement between Oracle EPM Cloud applications or instances. It copies data dynamically when triggered (e.g., via forms or rules). The three supported ways to create data maps with Smart Push are:

* A. From Planning to Tax Reporting Cloud: Incorrect. Smart Push does not support direct data movement from Planning to Tax Reporting Cloud, as these modules lack a predefined integration path for this feature.

* B. From Tax Reporting Cloud to Planning: Incorrect. Similarly, Smart Push does not facilitate data movement from Tax Reporting

Cloud to Planning.

* C. From Financial Consolidation and Close to Planning: Correct. Smart Push supports moving consolidated data (e.g., actuals) from Financial Consolidation and Close (FCC) to Planning for planning purposes.

* D. From Planning to Financial Consolidation and Close: Correct. Smart Push allows pushing planned data from Planning to FCC for consolidation or reporting.

* E. Between two Planning instances: Correct. Smart Push can move data between two Planning instances (e.g., test and production environments) to synchronize data.

These three options-C, D, and E-are explicitly supported by Smart Push in Oracle EPM Cloud, as per the documentation, enabling seamless data integration across these applications.

* Oracle EPM Cloud Documentation: "Data Integration with Smart Push" (docs.oracle.com, Published 2023-12-20, updated for 2024).

16. Frage

In Workforce, you want to set a date by which existing employees must be hired to be eligible to receive merit. You also want to specify the month in which merit should start.

Which option should you enable for this?

- A. Merit Month
- B. Workforce Assumptions
- **C. Merit Assumptions**
- D. Merit Rates

Antwort: C

Begründung:

In Oracle Planning 2024 Implementation's Workforce module, configuring merit-related settings for employees involves specifying eligibility criteria and timing, such as a hire date cutoff for existing employees to receive merit increases and the month when merit adjustments begin. The Merit Assumptions option is the correct choice for this purpose.

* B. Merit Assumptions: This feature allows administrators to define merit-related parameters, including the "hire by" date (the date by which employees must be hired to be eligible for merit) and the "merit start month" (the month when merit increases take effect). It provides a centralized way to set these assumptions, ensuring they are applied consistently across the workforce plan.

* A. Workforce Assumptions: This option covers broader workforce settings (e.g., default hire dates, salary assumptions), but it does not specifically address merit eligibility or timing details like hire-by dates or merit start months.

* C. Merit Rates: This pertains to defining the percentage or amount of merit increases, not the eligibility dates or start month for merit application.

* D. Merit Month: While this might seem relevant, "Merit Month" is not a standalone option in Workforce. It is a setting typically configured within Merit Assumptions, not an independent feature.

The Merit Assumptions option is explicitly designed to handle these merit-specific configurations, making it the most suitable choice.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Administering Workforce - Merit Assumptions" (docs.oracle.com, updated 2024). States that "Merit Assumptions allow setting the hire-by date for merit eligibility and the merit start month."

* Oracle Planning 2024 Implementation Study Guide: Confirms that Merit Assumptions is used to specify eligibility criteria and timing for merit increases in Workforce.

17. Frage

.....

1z0-1080-24 ist eine Oracle Zertifizierungsprüfung. So ist 1z0-1080-24 Zertifizierung der erste Schritt zur Oracle Zertifizierung. Deswegen ist die 1z0-1080-24 Zertifizierungsprüfung kürzlich immer beliebter geworden. Immer mehr Leute haben sich an der Oracle 1z0-1080-24 Zertifizierungsprüfung beteiligt. Aber die Erfolgsquote in der Prüfung ist nicht so hoch. Wählen Sie auch einschlägige Prüfungskurse, wenn Sie 1z0-1080-24 Prüfung ablegen möchten?
