And our ZDTA Study Materials can stand the test of the market and the candidates all over

the world. Besides, the prices for our ZDTA learning guide are quite favourable.

Zscaler Digital Transformation Administrator Sample Questions (Q98-Q103):

NEW QUESTION # 98

The Zscaler platform can protect against malicious files, URLs and content based on a number of criteria including reputation type. What type of checking is virus scanning?

- A. Site reputation
- B. SHA-256 hashing
- **C. Malware protection**
- D. File reputation

Answer: C

Explanation:

Virus scanning in the Zscaler platform is part of its Malware Protection capability, which inspects file content against known virus signatures and behaviors.

NEW QUESTION # 99

Can Notifications, based on Alert Rules, be sent with methods other than email?

- A. Leading ITSM systems can be connected to the Zero Trust Exchange using a NSS server, which will then connect to ITSM tools and forwards the alert.
- **B. In addition to email, text messages can be sent directly to one cell phone to alert the CISO who is then coordinating the work on the incident.**
- C. In addition to email, notifications, based on Alert Rules, can be shared with leading ITSM or UCAAS tools over Webhooks.
- D. Email is the only method for notifications as that is universally applicable and no other way of sending them makes sense.

Answer: B

Explanation:

Beyond email, Alert Rule notifications can be pushed via Webhooks to integrate with ITSM platforms or UCaaS tools, enabling real-time incident management and collaboration in your existing service desks or messaging systems.

NEW QUESTION # 100

Which of the following secures all IP unicast traffic?

- A. Enforce PAC
- B. Secure Shell (SSH)
- **C. Z-Tunnel 2.0**
- D. Tunnel with local proxy

Answer: C

Explanation:

Z-Tunnel 2.0 is the technology designed to secure all IP unicast traffic. It establishes encrypted tunnels between clients and Zscaler cloud edges, providing secure, transparent forwarding of all IP-based traffic, beyond just HTTP/S, ensuring comprehensive protection of network communications.

NEW QUESTION # 101

How is data gathered with ZDX Advanced client performance?

- A. By constantly analyzing live user sessions to critical SaaS applications and measuring the performance of those sessions.
- **B. By constantly analyzing live user sessions to both Internet and Private applications and measuring the performance of those**

sessions.

- C. By generating synthetic transactions to designated Internet and Private applications every 5 minutes and measuring the performance of those sessions.
- D. By using AI predictive analysis ZDX can extrapolate near-term client performance based upon recent past data observed.

Answer: B

Explanation:

ZDX Advanced gathers data by constantly analyzing live user sessions to both Internet and Private applications and measuring the performance of those sessions. This real-time monitoring provides accurate and up-to-date performance metrics, enabling quick identification and resolution of client-side performance issues.

The study guide states that synthetic transactions are a feature but the primary data collection for client performance is through live session analysis, ensuring precise user experience monitoring.

NEW QUESTION # 102

How is the relationship between App Connector Groups and Server Groups created?

- **A. When a new Server Group is created it points to the App_ Connector Groups that provide visibility to this Server Group**
- B. Both App Connector Groups and Server Groups are linked together via the Data Center element
- C. The relationship between App_ Connector Groups and Server Groups is established dynamically in the Zero Trust Exchange as users try to access Applications
- D. When you create a new App Connector Group you must select the list of Server Groups to which it provides visibility

Answer: A

Explanation:

When you create a Server Group in the ZPA admin console (or via API/Infrastructure-as-Code), you explicitly select which App Connector Groups should serve that Server Group. Those connector groups are then used to advertise reachability and steer traffic to the included application servers.

NEW QUESTION # 103

.....

We want to specify all details of various versions of our ZDTA study materials. We have three versions of our ZDTA exam braindumps: the PDF, Software and APP online. You can decide which one you prefer, when you made your decision and we believe your flaws will be amended and bring you favorable results even create chances with exact and accurate content of our ZDTA learning guide.
