100% Pass Quiz ZDTA - Zscaler Digital Transformation Administrator – Professional Reliable Exam Cost

You can change the time and type of questions of the Zscaler ZDTA exam dumps. Zscaler Digital Transformation Administrator practice questions improve your confidence and ability to complete the exam timely. The Zscaler ZDTA real questions are an advanced strategy to prepare you according to the test service. The Zscaler ZDTA Practice Exam software keeps track of previous attempts and shows the changes in each attempt. Knowing your weaknesses and overcoming them before the Zscaler ZDTA exam is easy.

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.
Topic 2	<ul style="list-style-type: none">Identity Services: This section of the exam measures skills of Identity and Access Management Engineers and covers foundational identity services including authentication and authorization protocols such as SAML, SCIM, and OIDC. Candidates should understand identity administration tasks and how to manage policies and audit logs within the Zscaler platform.

Topic 3	<ul style="list-style-type: none"> Zscaler Zero Trust Automation: This part measures Automation Engineers on their ability to utilize Zscaler APIs, including the One API framework, for automating zero trust security functions and integrating with broader enterprise security and orchestration tools.
Topic 4	<ul style="list-style-type: none"> This section assesses Data Protection Officers on techniques to secure data across motion, SaaS, cloud, and endpoints using Zscaler's AI-driven data discovery and data protection technologies. It involves securing BYOD environments and understanding risk management to protect sensitive information.
Topic 5	<ul style="list-style-type: none"> Zscaler Digital Experience: This section evaluates Network Performance Analysts on their knowledge of Zscaler Digital Experience (ZDX), including understanding the ZDX score, architectural overview, features, functionalities, and practical use cases to optimize digital user experiences.
Topic 6	<ul style="list-style-type: none"> Cyberthreat Protection Services: This domain targets Cybersecurity Analysts and covers broad cybersecurity fundamentals and advanced threat protection capabilities. Candidates must know about malware protection, intrusion prevention systems, command and control channel detection, deception technologies, identity threat detection and response, browser isolation, and incident detection and response. Data Protection Services
Topic 7	<ul style="list-style-type: none"> Connectivity Services: This domain evaluates Network Security Engineers on configuring and managing connectivity essentials like device posture assessment, trusted network definitions, browser access controls, and TLS SSL inspection deployment. It also includes applying policy frameworks focused on authentication and enforcement for internet access, private access, and digital experience.
Topic 8	<ul style="list-style-type: none"> Risk Management: This domain measures skills of Risk Managers and Security Architects in using Zscaler's comprehensive risk management suite. Candidates are expected to understand risk capabilities, dashboards, asset and financial risk insights, vulnerability management, deception tactics, identity protection, and breach prediction analytics.

Zscaler Digital Transformation Administrator Sample Questions (Q107-Q112):

NEW QUESTION # 107

An administrator needs to SSL inspect all traffic but one specific URL category. The administrator decides to create two policies, one to inspect all traffic and another one to bypass the specific category. What is the logical sequence in which they have to appear in the list?

- A. All policies both generic and specific will be evaluated so no specific order is required.
- B. Both policies are incompatible, so it is not possible to have them together.
- C. First the policy for the generic "inspect all", then further down the list the policy for the exception Category.
- D. First the policy for the exception Category, then further down the list the policy for the generic "inspect all."**

Answer: D

Explanation:

When creating SSL inspection policies, the exception policy for the specific URL category must appear first in the policy list, followed by the more generic "inspect all" policy further down. Zscaler evaluates policies in order, so placing the exception first ensures that traffic matching that category bypasses inspection before the generic policy is applied.

The study guide emphasizes the importance of policy order to ensure correct application of exceptions and general rules.

NEW QUESTION # 108

When configuring a ZDX custom application and choosing Type: 'Network' and completing the configuration by defining the necessary probe(s), which performance metrics will an administrator NOT get for users after enabling the application?

- A. Client Gateway IP Address
- B. Server Response Time
- C. Disk I/O**

- D. ZDX Score

Answer: C

Explanation:

When a ZDX custom application is configured with the type set to 'Network', the administrator will not get Disk I/O metrics for users. Disk I/O metrics relate to local client device performance and are not part of network-type application probes which focus on network latency, server response, and other network-centric measurements.

The study guide notes that Disk I/O is part of endpoint-level monitoring and is not collected by network-type probes, unlike metrics such as Server Response Time or ZDX Score which are network related.

NEW QUESTION # 109

How is data gathered with ZDX Advanced client performance?

- A. By generating synthetic transactions to designated Internet and Private applications every 5 minutes and measuring the performance of those sessions.
- B. By using AI predictive analysis ZDX can extrapolate near-term client performance based upon recent past data observed.
- **C. By constantly analyzing live user sessions to both Internet and Private applications and measuring the performance of those sessions.**
- D. By constantly analyzing live user sessions to critical SaaS applications and measuring the performance of those sessions.

Answer: C

Explanation:

ZDX Advanced gathers data by constantly analyzing live user sessions to both Internet and Private applications and measuring the performance of those sessions. This real-time monitoring provides accurate and up-to-date performance metrics, enabling quick identification and resolution of client-side performance issues.

The study guide states that synthetic transactions are a feature but the primary data collection for client performance is through live session analysis, ensuring precise user experience monitoring.

NEW QUESTION # 110

When configuring Zscaler Private Access, what is the function of the Server Group?

- A. Maps Applications to Application Groups
- B. Maps Applications to FQDNs
- C. Maps App Connector Groups to Application Segments
- **D. Maps FQDNs to IP Addresses**

Answer: D

Explanation:

A Server Group holds the actual backend endpoints - defined by FQDNs (or IPs) and ports - and effectively maps those FQDNs to their IP addresses so ZPA knows which hosts to steer traffic toward.

NEW QUESTION # 111

In which of the following SaaS apps can you protect data at rest via Zscaler's out-of-band CASB solution?

- A. Yahoo Mail
- B. Twitter.
- **C. Google Drive.**
- D. Facebook.

Answer: C

Explanation:

Zscaler's out-of-band CASB solution supports data-at-rest protection for cloud storage platforms like Google Drive, enabling scanning and governance of files stored there.

NEW QUESTION # 112

.....

The customer is God. ZDTA learning dumps provide all customers with high quality after-sales service. After your payment is successful, we will dispatch a dedicated IT staff to provide online remote assistance for you to solve problems in the process of download and installation. During your studies, ZDTA study tool will provide you with efficient 24-hour online services. You can email us anytime, anywhere to ask any questions you have about our ZDTA Study Tool. At the same time, our industry experts will continue to update and supplement ZDTA test question according to changes in the exam outline, so that you can concentrate on completing the review of all exam content without having to pay attention to changes in the outside world.
