

# Zscaler ZDTA Reliable Exam Pattern & ZDTA Dumps Cost

P.S. Free & New ZDTA dumps are available on Google Drive shared by GuideTorrent: <https://drive.google.com/open?id=1aLTV-z4gUr5EZ7DEI5T5ACN50iqNBV5p>

Our ZDTA guide torrent has gone through strict analysis and summary according to the past exam papers and the popular trend in the industry and are revised and updated according to the change of the syllabus and the latest development conditions in the theory and the practice. The ZDTA exam questions have simplified the sophisticated notions. The software boosts varied self-learning and self-assessment functions to check the learning results. The software of our ZDTA Test Torrent provides the statistics report function and help the students find the weak links and deal with them.

## Zscaler ZDTA Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>• Cyberthreat Protection Services: This domain targets Cybersecurity Analysts and covers broad cybersecurity fundamentals and advanced threat protection capabilities. Candidates must know about malware protection, intrusion prevention systems, command and control channel detection, deception technologies, identity threat detection and response, browser isolation, and incident detection and response.</li><li>• Data Protection Services</li></ul> |
| Topic 2 | <ul style="list-style-type: none"><li>• Zscaler Digital Experience: This section evaluates Network Performance Analysts on their knowledge of Zscaler Digital Experience (ZDX), including understanding the ZDX score, architectural overview, features, functionalities, and practical use cases to optimize digital user experiences.</li></ul>                                                                                                                                                     |
| Topic 3 | <ul style="list-style-type: none"><li>• Platform Services: This section measures skills of Cloud Infrastructure Engineers and focuses on the suite of Zscaler platform services. Key topics include advanced device posture assessments, TLS inspection mechanics, and the application of policy frameworks governing internet, private access, and digital experience services.</li></ul>                                                                                                            |
| Topic 4 | <ul style="list-style-type: none"><li>• Risk Management: This domain measures skills of Risk Managers and Security Architects in using Zscaler's comprehensive risk management suite. Candidates are expected to understand risk capabilities, dashboards, asset and financial risk insights, vulnerability management, deception tactics, identity protection, and breach prediction analytics.</li></ul>                                                                                            |
| Topic 5 | <ul style="list-style-type: none"><li>• Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.</li></ul>                                                                              |
|         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|         |                                                                                                                                                                                                                                                                                                                                                                                                                          |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 6 | <ul style="list-style-type: none"> <li>Identity Services: This section of the exam measures skills of Identity and Access Management Engineers and covers foundational identity services including authentication and authorization protocols such as SAML, SCIM, and OIDC. Candidates should understand identity administration tasks and how to manage policies and audit logs within the Zscaler platform.</li> </ul> |
| Topic 7 | <ul style="list-style-type: none"> <li>This section assesses Data Protection Officers on techniques to secure data across motion, SaaS, cloud, and endpoints using Zscaler's AI-driven data discovery and data protection technologies. It involves securing BYOD environments and understanding risk management to protect sensitive information.</li> </ul>                                                            |

## Demo Version and Zscaler ZDTA Free Questions Updates for Up to 12 Months

After you purchase our ZDTA study material, you must really absorb the content in order to pass the exam. Our ZDTA guide quiz really wants you to learn something and achieve your goals. And it is easy and convenient for you to make it. For we have three versions of the ZDTA Exam Questions for you to choose: the PDF, Software and APP online. So that you can study at any time you like. And the content of the ZDTA learning braindumps is also simplified for you to easily understand.

## Zscaler Digital Transformation Administrator Sample Questions (Q93-Q98):

### NEW QUESTION # 93

What happens after the Zscaler Client Connector receives a valid SAML response from the Identity Provider (IdP)?

- A. The SAML response is sent back to the user's device for local validation.
- B. Zscaler Internet Access validates the SAML response and returns an authentication token.**
- C. There is no need for further actions as the SAML is valid, access is granted immediately.
- D. The Zscaler Client Connector Portal authenticates the user directly.

**Answer: B**

Explanation:

After the Zscaler Client Connector (ZCC) receives a valid SAML response, Zscaler Internet Access (ZIA) takes over to validate the SAML assertion. Upon successful validation, ZIA issues an authentication token that allows the user to access services securely. This centralized validation ensures authentication integrity and enables seamless policy enforcement across Zscaler services.

### NEW QUESTION # 94

Which of the following are types of device posture?

- A. Certificate Trust, File Path, Full Disk Encryption
- B. Unauthorized Modification, OS Version, License Key**
- C. Detect CrowdStrike, CrowdStrike ZTA score, First name
- D. Domain Joined, Process Check, Deception Check

**Answer: B**

Explanation:

Types of device posture typically include attributes that reflect the security and compliance status of a device.

This includes Unauthorized Modification, which checks if the device has unauthorized changes; OS Version, verifying if the operating system is up-to-date; and License Key, confirming the validity of software licenses on the device. These attributes help in assessing device trustworthiness for access control.

Other options include some irrelevant attributes such as "First name" or product-specific detections not generally categorized as device posture in Zscaler's framework.

### NEW QUESTION # 95

What is the primary function of the on-premises VM in the EDM process?

- A. To store sensitive data securely and prevent unauthorized data access.
- B. To automate the indexing process by creating hashes for structured data elements.
- **C. To local analyze cloud transactions for potential PII exfiltration.**
- D. To replicate sensitive data across all organizational servers.

**Answer: C**

Explanation:

The on-premises VM in the Enterprise Data Management (EDM) process primarily locally analyzes cloud transactions for potential Personally Identifiable Information (PII) exfiltration. This allows organizations to detect and prevent sensitive data leaving their environment by inspecting cloud interactions close to their premises.

The study guide highlights that the VM acts as a local control point in the EDM workflow, ensuring sensitive data protection during cloud transactions.

### NEW QUESTION # 96

Which of the following is an unsupported tunnel type?

- **A. Secure Socket Tunneling Protocol (SSTP)**
- B. Proprietary Microtunnels
- C. HTTP Connect Tunnels
- D. Generic Routing and Encapsulation (GRE)

**Answer: A**

Explanation:

Secure Socket Tunneling Protocol (SSTP) is not supported as a tunnel type by Zscaler. Zscaler supports GRE, HTTP Connect tunnels, and its own proprietary Microtunnels for traffic forwarding and secure connectivity, but SSTP is not among the supported tunnel protocols.

### NEW QUESTION # 97

Can Notifications, based on Alert Rules, be sent with methods other than email?

- A. Leading ITSM systems can be connected to the Zero Trust Exchange using a NSS server, which will then connect to ITSM tools and forwards the alert.
- **B. In addition to email, text messages can be sent directly to one cell phone to alert the CISO who is then coordinating the work on the incident.**
- C. In addition to email, notifications, based on Alert Rules, can be shared with leading ITSM or UCAAS tools over Webhooks.
- D. Email is the only method for notifications as that is universally applicable and no other way of sending them makes sense.

**Answer: B**

Explanation:

Beyond email, Alert Rule notifications can be pushed via Webhooks to integrate with ITSM platforms or UCaaS tools, enabling real-time incident management and collaboration in your existing service desks or messaging systems.

### NEW QUESTION # 98

.....

They work closely and check all Zscaler ZDTA exam practice test questions step by step and ensure the top standard of ZDTA exam questions all the time. So rest assured that with the ZDTA exam dumps you will get everything that you need to prepare and pass the Zscaler ZDTA Certification Exam with good scores. Countless Zscaler Digital Transformation Administrator exam candidates have passed their ZDTA exam and they all got help from real and updated Zscaler ZDTA exam questions. You can also be the next successful candidate for the ZDTA certification exam.
